

**Welcome to a new edition of the QROWD quarterly newsletter.**

July 2019

We are happy to share with you the latest update on the QROWD project. Over this period QROWD has participated in different AW4 and ESWC 2019 events and is currently preparing for its participation in Trento Smart City Labs, who are one of the project partners based in Italy. We are also preparing to attend, the European Big Data Value Forum after the summer, where some demos will be presented.

We will be keeping you informed of this and more in our next edition. Enjoy reading,

In this issue:

- Cargo Bikes and Smart Mobility
- Smart Mobility in a Digitally Divided World
- Citizen-Centric Services for Smarter Cities
- Trento Smart City Labs
- QROWD at AW4 and ESWC 2019
- Upcoming events (August - September 2019)

### **Cargo Bikes and Smart Mobility**

Smart transport is getting smarter. In recent years there has been an increase in the development of policies supporting new transport as well as calls for funds and proposals. One such recent fund, based in the UK, focuses on helping companies to invest in cargo bikes. Read more about this [here](#).

### **Smart Mobility in a Digitally Divided World**

Smart mobility and cities have been a hot trend in recent years. Smart cities do not become “smart” overnight and the inability of projects, policies and collaborations to keep up with technological development is a key problem for smart cities and mobility.

For further information follow the link [here](#).

## Citizen-Centric Services for Smarter Cities

How can city authorities effectively integrate and engage citizens in the inception and development of data-based services for #SmartCities? Read more about it [here](#).

## Trento Smart City Labs

Since September 2018 the Municipality of Trento has been organising a series of informal meetings with its citizens in the main squares, high schools and in each neighbourhood of the city. The “Trento Smart City Labs” are intended to illustrate the smart services that are or will be available in Trento. Read more about the Trento Smart City Labs [here](#).

## QROWD at AW4 and ESWC 2019 events

The QROWD project has had a busy few weeks presenting and disseminating their research at various events, workshops and conferences across Europe. For each of these, the team has been showcasing the cutting edge of crowdsourcing and smart mobility innovation that we have been working on during our project. To take a look at some of these events in more detail click it [here](#).
